For B.A Part III

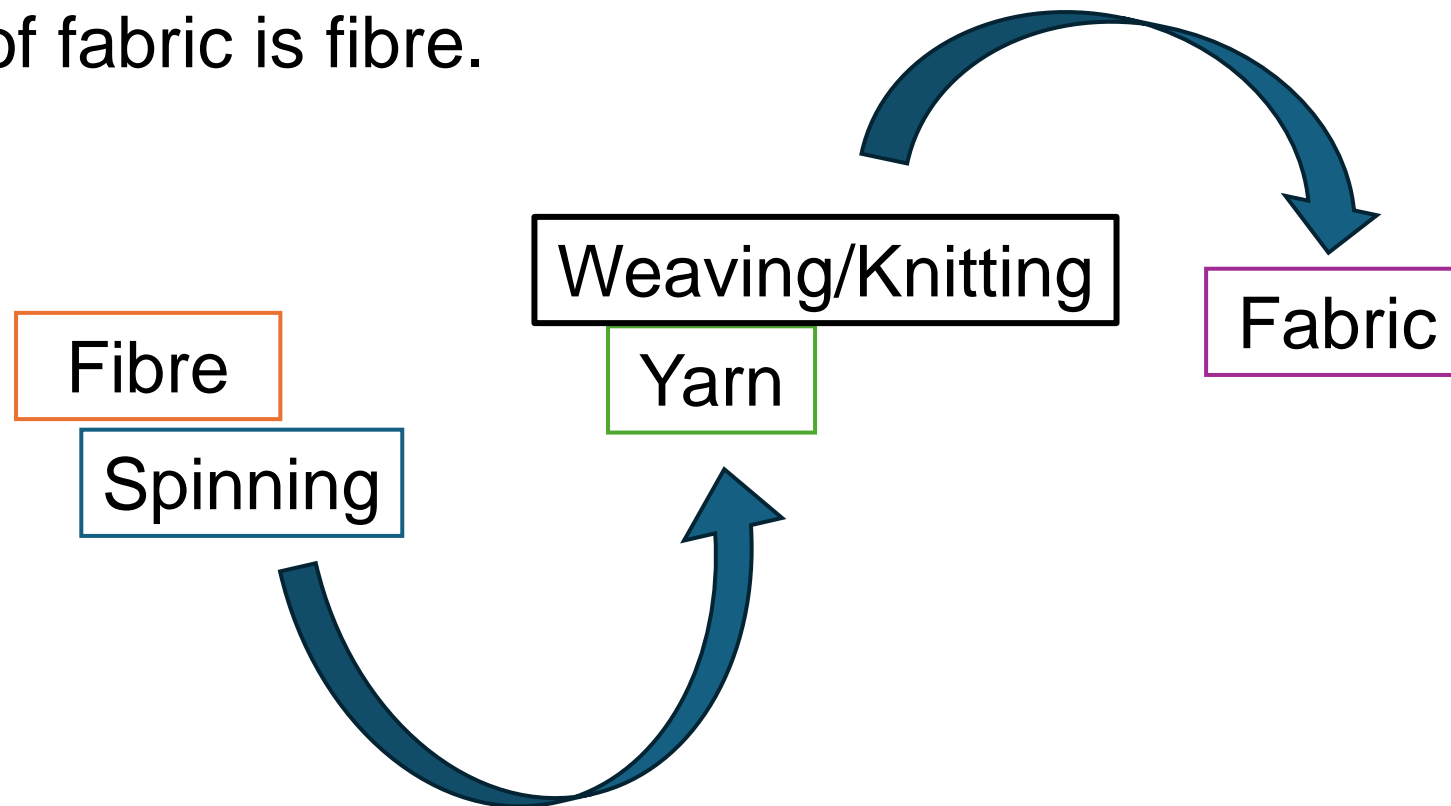

What is Fabric???

- A fabric is any piece of cloth.
- Clothes are as important as food and shelter.

Fiber???

Basic unit of fabric is fibre.

Definition of fiber

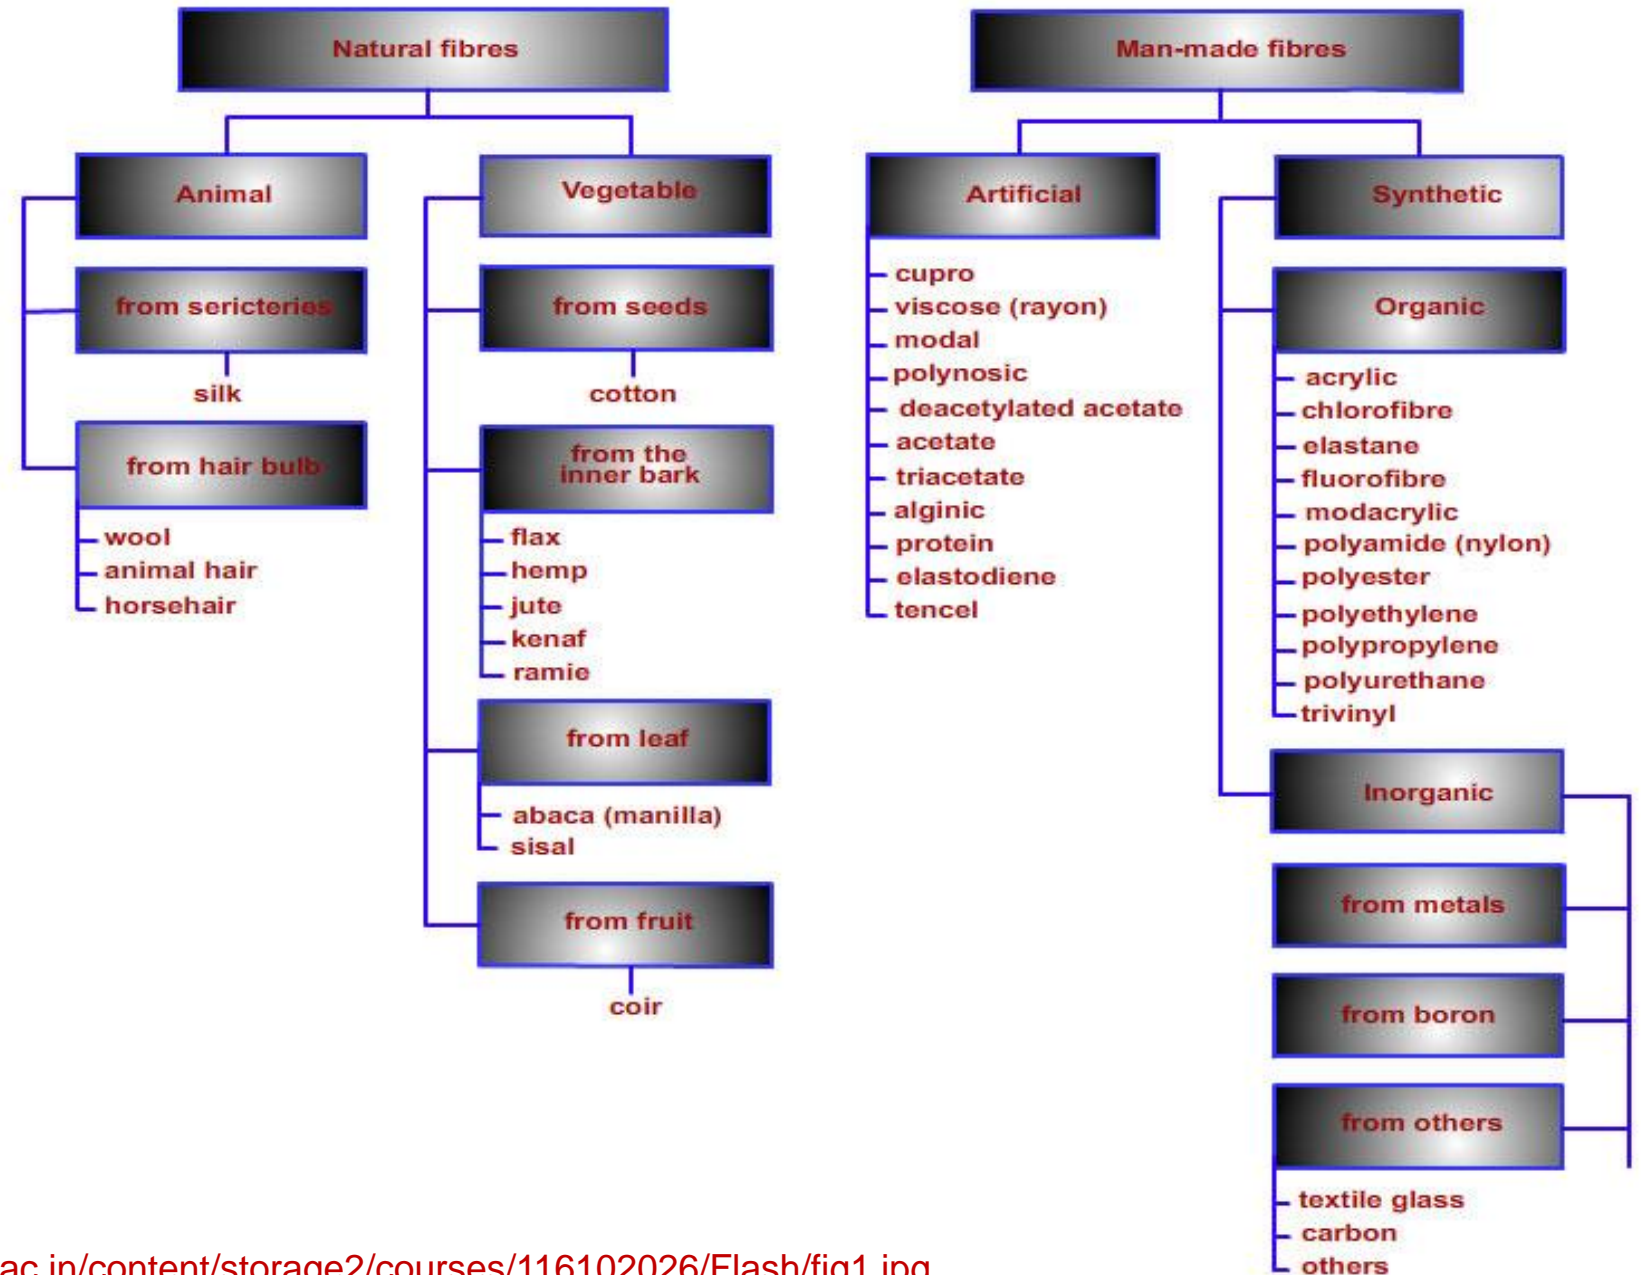

- They are long, thin strands that can be spun or extruded into yarns or threads and then woven, knitted, or pressed into fabrics.
- Textile fibres can be natural or synthetic, and each type of fibre has unique properties that determine its suitability for different types of textiles.

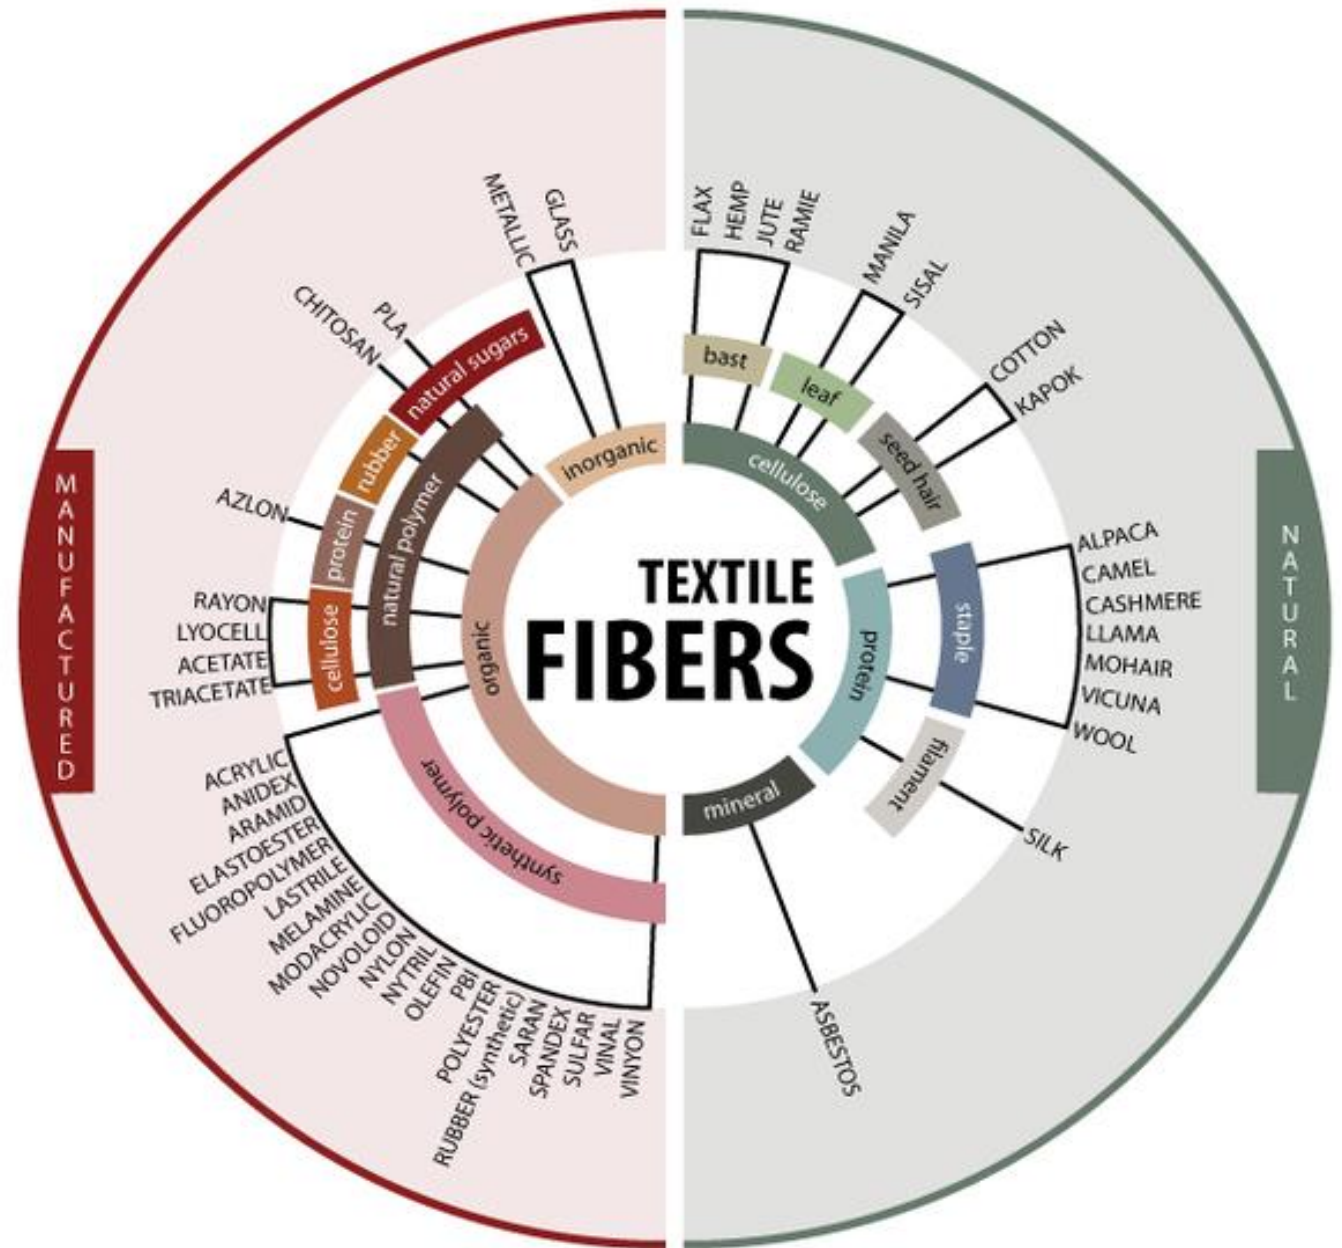

Classification of fibres

ON THE
BASIS OF
ORIGIN

Classification
of fibres

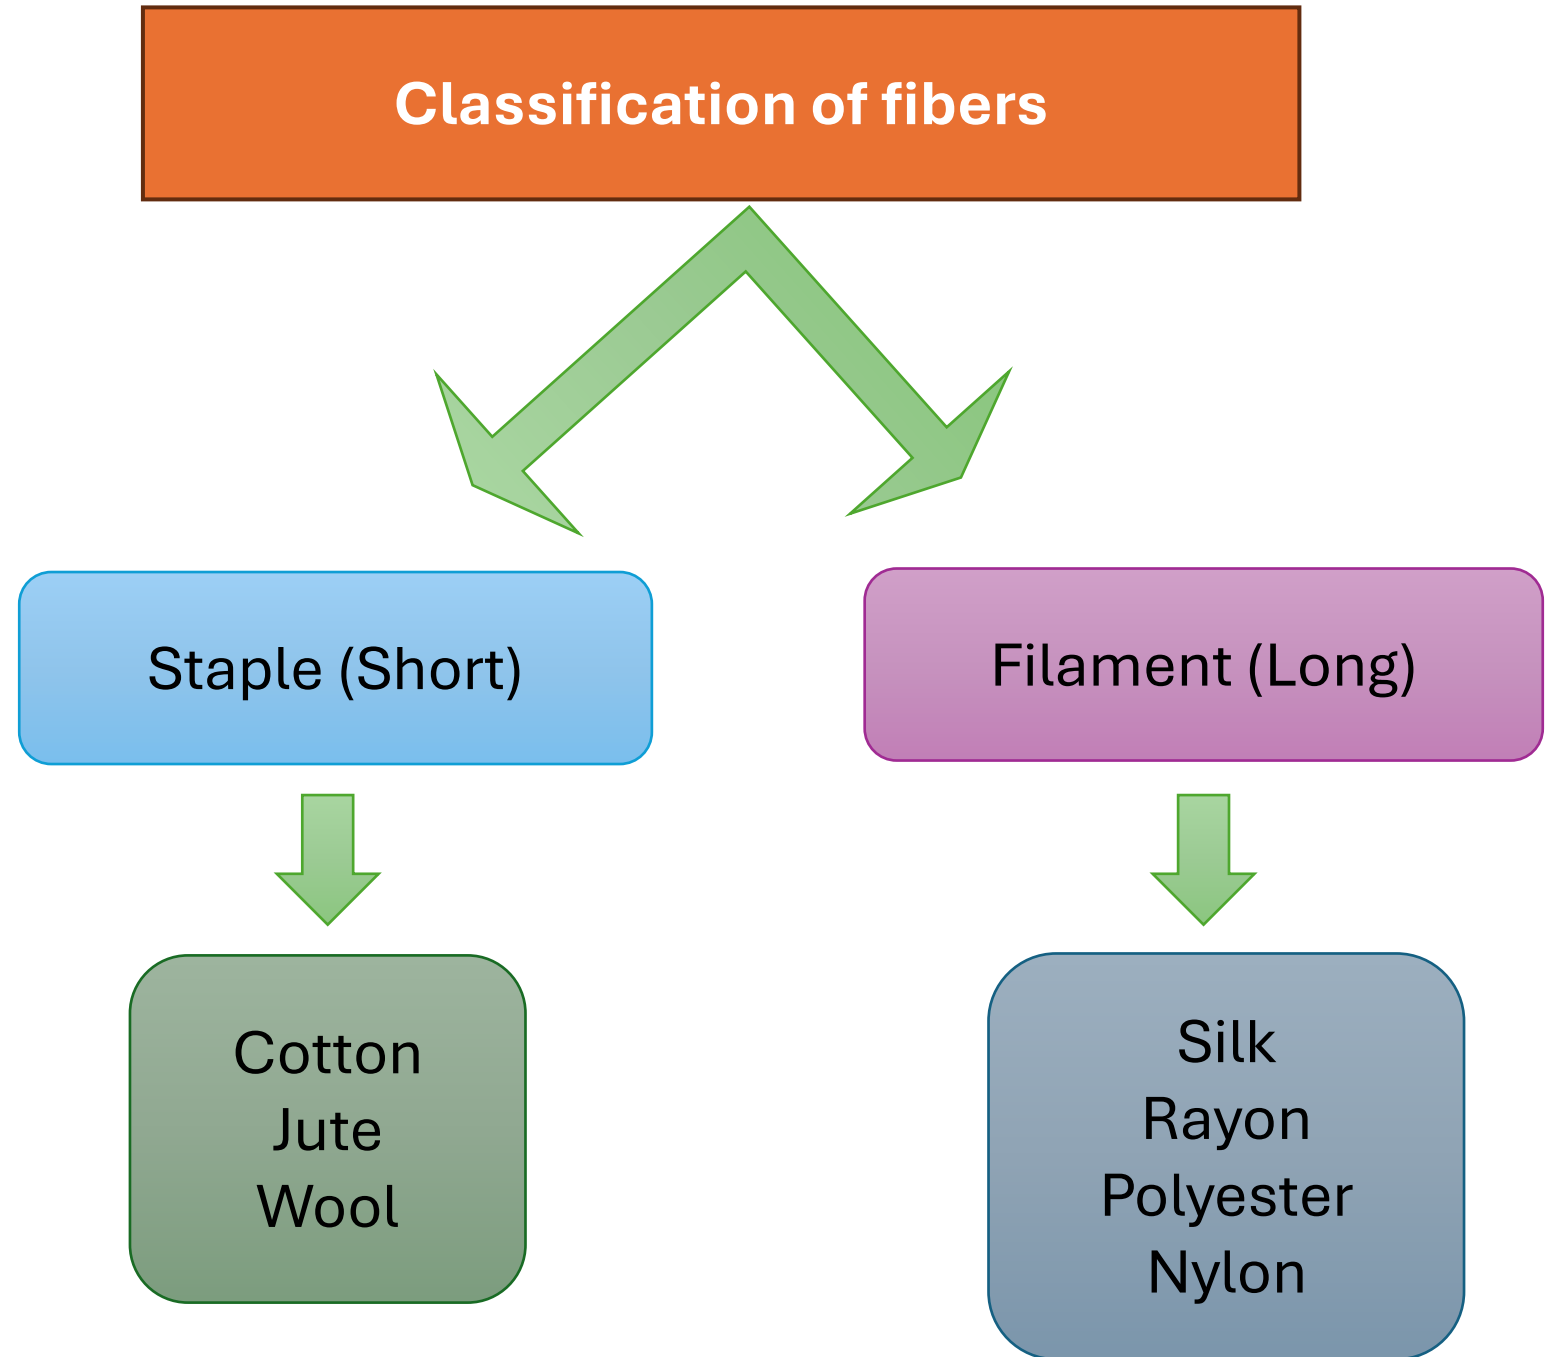

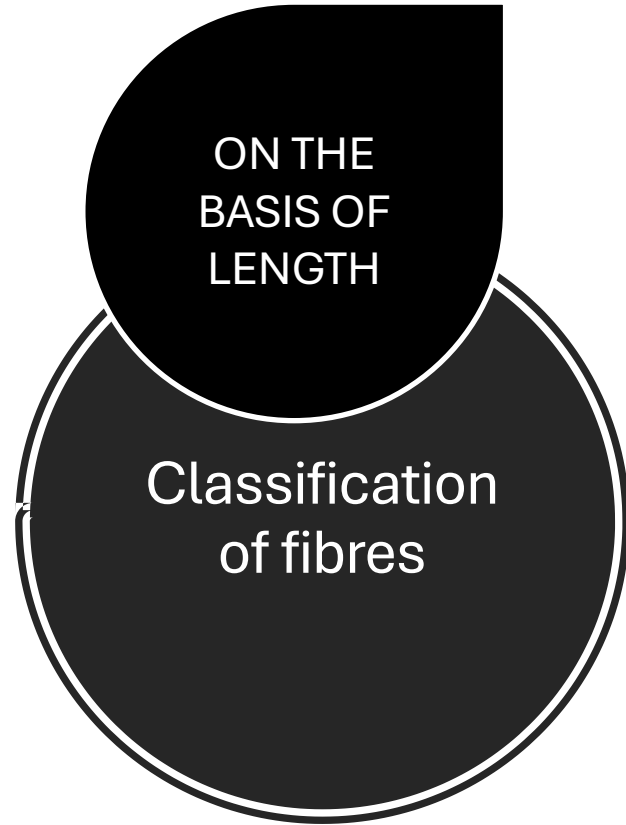

Generic classification based on chemical composition as defined by the textile Fiber Products Identification Act (Manufactured Category)
