

(3)

It is at this stage of first 6-8 sessions of SCT & RIO,
free association method, etc. Psychoanalyst finds the following
& orthodox Psychoanalyst states: Sexual conflicts &
other phobias & fears are present. A variety of situations
exist in which anxiety is present & not generalized.
Fear of situations like heights, water, etc.

(iii) Behavioural treatment → Phobia & treatment
of other symptoms follow on systematic desensitization,
modelling, etc. - Floating anxiety types & fear of first period,
of which phobia of heights & water & such & blood
phobia & anxiety of this or that object. Also applied tension
and anxiety & at various stages of SCT & RIO.
